---> Comment Text :  
Please do not transport nuclear waste by rail system.. We live very near railroad tracks and never would have moved here had we known that this is even being considered. Also there is an elementary school less than a tenth of a mile from the tracks. This is a potentially very dangerous situation. We just had a derailment of coal two months ago. Thank God it was just coal. It was very close to a residential area as the trains go right through the heart of Webster Groves, Mo. Please do not transport nuclear waste through our town.
